Scientific talk on Research in Life sciences

Topic:- “Central Regulation of Reproduction in Mammals”

Key note speaker:- Dr. Praful Singru, NISER, Bhubaneswar

Date: 19th October 2022

Venue: Botany Laboratory

Department of Zoology and Research and Development cell has organized a scientific talk for Post graduate and under graduate students to facilitate the new research horizon and to inculcate research temperament. Dr. Praful Singru, Associate professor, Biological Sciences, NISER, Bhubaneswar has delivered a talk on “Central regulation of reproduction in Mammals” on 19th October 2022. He has enlightened the students with basic concept of hormonal and neuropeptide regulation during reproductive phases in mammals and throw a focus on preoptic area and GnRH neuron working processes. He has carried regulation methods and observed that in contrast to mammals, birds have higher basal metabolic rate and undertake wide range of energy-demanding activities. As a consequence, food deprivation to birds, even for a short-period, poses major energy challenge. The energy-regulating hypothalamic homeostatic mechanisms, although extensively studied in mammals, are far from clear in the case of birds. We focus on the interplay between neuropeptide Y (NPY) and thyrotropin-releasing hormone (TRH), two of the most important hypothalamic signaling agents, in modulating the energy balance in a bird model, zebra finch, *Taeniopygia guttata*. TRH neurons were confined to a few nuclei in the preoptic area and hypothalamus, and fibers widely distributed. Majority of TRH neurons in the hypothalamic paraventricular nucleus (PVN) whose axons terminate in median eminence were contacted by NPY-containing axons. Dr. Yogesh Bhute was introduce and welcome Dr. Singru. About 62 students of PG and UG were preset for this lecture.
