7.2.1: Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual.

I) First Best Practice: Book bank and Deposit scheme

1. Goal:

- To help the students of poor and weaker sections of society with reading materials in the form of books.
- To help those students who can't purchase the books necessary for their studies.
- To enable them to improve their performance in the examination.

2. The Context: Our college is situated in a locality where socioeconomically weaker section students reside. Most of the students belong to educationally backward classes and poor families with no proper guidance at home. The Management of the college not only desires to provide education to them but also ensures that students do not discontinue their education due to a lack of facilities and financial availability. In every academic year, up to 5 library books are issued among students at a time especially during exams.

3. The Practice: Students can issue only 1 book at a time on the library card. They need to hand over the card before the exams. Thus, they can not issue any books after that. The library of our college runs 2 schemes for the convenience of the students

A. Book Bank Scheme: This scheme is for poor students who cannot afford to buy books for their education. Through this, students can issue 4 to 5 books at a time without paying any amount and without a library card. During this session, **422 books** were issued by **113 students** under this scheme.

B. Deposit scheme: At the time of exams, students need more books for a longer time. This scheme is implemented 45 days before the exam. This scheme is for all the students of our institution. In this, students can issue books by paying some amount which is refunded after the books are returned. Students can issue up to 5 books at a time in this. During this session, **1526 books** were issued by **703 students** under this scheme.

4. Evidence of Success: Every year a large number of needy students took benefit of the scheme and scored well in exams.

II) Second Best Practice:

1. Title of practice: Career with Chemistry

2. Objectives of the Practice

- To provide guidance and assistance for the students to achieve their career goals.
- To create awareness among students regarding available career options in Chemistry and help them in identifying their career objectives.
- To help students share knowledge about themselves by identifying skills, and interests.
- To provide career guidance to the students, to improve their employment opportunities and also create awareness of the jobs for which the students are eligible.
- To make them aware about campus and off-campus placement drives.
- For the enrichment of our subject.
- To identify potential of students and assist them achieving their desirable goals.

3. The Context

We, the faculties of department of chemistry had observed that the students of B.Sc. and even M.Sc. are mostly unaware of most of the career opportunities in the field of chemistry. As majority of the crowd amongst our students are from educational backward families, they get hardly any guidance from their families. So, we found it very necessary to make them aware about various career options that they can have after completing their Graduation or postgraduation with chemistry. We decided to demonstrate them as much as possible options about jobs as well as higher studies and research. For this we decide to organize some workshops, guest lectures as well as discussion sessions with experts for the students.

4. The Practice

"Career with Chemistry" is a multi-day workshop series organized annually by the department, designed to help both intra and inter-collegiate students explore various professional paths in chemistry. For three consecutive years, the department has been organizing multi-day workshops on "Career with Chemistry" for both intra and inter-collegiate students. These workshops offer students the opportunity to explore a wide range of career options in chemistry, including opportunities at BARC, lectureships, JRF, Maha Genco, GSI, ONGC, and in Forensic Science. The workshop series aims to inspire and equip students with the knowledge and vision needed to pursue successful careers in chemistry.

In this year, A workshop on “Careers with Chemistry” for the final year Undergraduate students on 25th August, 2023 which demonstrated the various research and career opportunities a student can opt after completing M.Sc. Chemistry. A similar approach was also undertaken for the students of the junior college to enlighten them about the various aspects of employments with respect to chemistry on 12th February, 2024.

5. Evidence of Success (200)

It has been observed that a lot of students get benefit by these workshops and are successfully placed. The number of students joining M.Sc. Chemistry has drastically increased form 6 in 22-23 to 25 in 2023-24.
